

Radar Ready

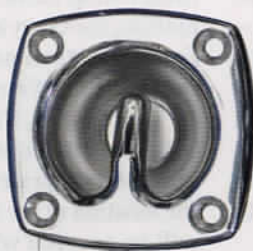

T-760 SERIES RADAR STARTS AT \$2,095

he right radar can complement any size boat and budget. SI-TEX Marine Electronics' T-760 Series Radar is equipped with a variety of advanced features — touchscreen control and a color LCD display, as well as AIS target tracking and standard MARPA. The T-760 Series Radar also includes professional-grade details, such as multispeed antenna rotation, standard 50-target AIS capabilities and powerful 4 kw transmitters to ensure accurate detection of large and small targets. *SI-TEX Marine Electronics, (631) 996-2690, si-tex.com*

Trout Tape

HAWG TAPE \$19.95

➤ Serious anglers who don't want to waste a minute getting their line back into the water need to get their catch measured quickly. Hawg Tape from F&H Decals is applied directly to the carpet near the foot pedal and trolling motor and helps anglers take quick and accurate measurements of their catch. It's slip resistant, movable and made of a durable vinyl, capable of withstanding foot traffic and heavy tackle being thrown around. Boaters don't have to lose time fishing around for their measuring devices after they reel in a catch — they can move right along to reeling in the next one. *F&H Decals, (855) 343-325, fhdecals.com*

Tow the Line

198 SKI TOW \$45.93

➤ A good ski tow will provide a strong and secure connection for a water-skier's rope. Accon Marine's 198 Ski Tow offers the additional feature of a flush-mounted installation, which keeps the transom clear of protrusions during non-watersports times. The four-piece ski tow includes the main body, a sealing cup, a backing plate and the gasket. Installation is simple — owners need only drill a 2½-inch hole and attach the ski tow with four ¼-inch screws. *Accon Marine, (727) 572-9202, acconmarine.com*

Bumpin' Beats

JAHD240BT 2-CHANNEL BLUETOOTH AMPLIFIER \$139.99

➤ Forget about heavy stereo electronics and sound systems. The perfect soundtrack to complement a day out on the water can be played from your Bluetooth-enabled device, using Jensen Marine's JAHD240BT 2-channel Bluetooth amplifier. The sleek unit is waterproof and allows users to stream their audio content from their personal music library to the amplifier. All playback and volume options are controlled by the boater's Bluetooth-enabled device. Guaranteed to withstand any rough waters, the unit is corrosion resistant and has an epoxy-potted die-cast enclosure for added durability. *ASA Electronics, asaelectronics.com*
